PROFESSIONAL SUMMARY

Full Stack Developer with MCA and 6+ months of professional experience at Infosys building scalable web applications using Java, Python, Spring Boot, and Flask. Proven expertise in RESTful API development, CRUD operations, PostgreSQL/MySQL database design, and Agile development. Delivered full-stack e-commerce and recommendation system projects end-to-end. Seeking a software engineering role to contribute backend and full-stack capabilities to a product-driven team.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript

Backend Frameworks: Spring Boot, Flask (REST API Development)

Frontend: HTML5, CSS3, JavaScript (ES6+), Dynamic Content Rendering

Databases: MySQL, PostgreSQL (Joins, Indexing, Query Optimization, Schema Design)

Tools & Platforms: Git, GitHub, Postman, Unix/Linux, VS Code

Concepts: Data Structures & Algorithms, OOP, MVC Architecture, SDLC, Agile/Scrum

Data / ML: Python ML libraries, Content-based Filtering, Data Processing

PROFESSIONAL EXPERIENCE

System Engineer | Infosys, Bangalore, Karnataka - Sep 2025 – Apr 2026

- Developed and maintained scalable web application features using Python and modern full-stack development practices, improving code maintainability by adopting modular architecture.
- Implemented backend business logic and integrated RESTful APIs with frontend components; reduced API response handling errors by standardizing JSON data contracts.
- Participated in Agile/Scrum development cycles — contributed to sprint planning, requirement analysis, and daily standups across cross-functional teams.
- Wrote clean, reusable, and well-documented code following MVC architecture, resulting in improved team velocity during code review cycles.
- Collaborated with QA and product teams to deliver features aligned with business requirements on time.

Full Stack Developer Intern | CDAC, New Delhi, India - Jan 2025 – May 2025

- Built full-stack web applications using Spring Boot (backend) and HTML, CSS, JavaScript (frontend), delivering this functional project during the internship period.
- Designed and developed RESTful APIs for business logic and client-server communication, handling JSON-based data exchange for all CRUD operations.
- Engineered PostgreSQL database schemas and optimized SQL queries, improving data retrieval efficiency for relational datasets.
- Maintained version control using Git/GitHub with structured branching and commit practices across all projects.

PROJECTS

Infymart – Full Stack E-Commerce Web Application | Tech Stack: Python (Flask), HTML5, CSS3, JavaScript, MySQL

- Designed and built a full-stack e-commerce platform with product catalog, user authentication (session management), shopping cart, and order management features.
- Architected RESTful Flask APIs for all business logic; implemented clean separation between frontend and backend layers using MVC pattern.

- Designed normalized MySQL database schema for users, products, inventory, and transactions; ensured data integrity with foreign key constraints.
- Implemented dynamic content rendering on the frontend using JavaScript, improving user interactivity and page load efficiency.

Movie Recommender System | Tech Stack: Python, Scikit-learn, Pandas, Content-Based Filtering

- Built a content-based movie recommendation engine using machine learning; processed and vectorized user preference data to generate personalized recommendations.
- Improved recommendation accuracy through feature engineering and cosine similarity scoring, increasing simulated user engagement.
- Implemented data preprocessing pipeline using Pandas to clean and normalize raw dataset for model consumption.

EDUCATION

Master of Computer Applications (MCA) - CGPA: 7.1

Banasthali Vidyapeeth | Graduated 2025

Bachelor of Science - CGPA: 8.4

Banasthali Vidyapeeth

CERTIFICATIONS

- Data Structures and Algorithms using Java
- Advanced Unix
- Advanced Python Concepts
- Web Application Development using Flask
